

ARC Community Services
Fond du Lac, Wisconsin

Just after intake, please inform client of these facts:

We would like to inform you of some important information:

New studies show that attending your first four scheduled days of treatment is very important. By attending all of your first four days, you are significantly more likely to stay clean and sober for the long haul. Clients who attend their first four treatment days are also less likely to be arrested or incarcerated after treatment. If you only attend two of your first four days of treatment, your chances of completing this program successfully are only 5%. By attending all four days, you increase your chance of completing successfully to 57%. This may be due to the fact that by attending treatment every session, you are making a commitment to treatment and making treatment your top priority.

Can you make a commitment to attending all of your first four scheduled days of treatment?

Are there any problems that may keep you from getting here your first four days?

What can we do to help you with those problems so that you can get to treatment?
